Profile

Computer Science graduate from NGIT specialized in AI/ML and currently a Programmer Analyst Trainee at Cognizant. Having completed an intensive 4-month training program, I transitioned into professional Java Full Stack development, specializing in Spring Boot, React and Microservices architecture. I have a strong foundation in Data Structures and Algorithms and hands-on experience with Java, Python, JavaScript, and MySQL. During my training, I developed a full-stack mini-project, building the end-to-end architecture from frontend to database integration. I am a quick learner, eager to apply my technical skills to create scalable, data-driven solutions.

Skills and Technologies

Programming Languages: Java, Python, JavaScript, SQL

Web Technologies: React, Tailwind CSS, HTML5, CSS3, Bootstrap, REST APIs

Frameworks & Backend: Spring Boot, Spring Framework, Hibernate, Flask, Streamlit, Microservices

Database Management: MySQL

AI & Data Science: LangChain, NumPy, Pandas, Scikit-learn, Matplotlib, Generative AI

Tools & Version Control: Git, GitHub, Postman, Jira

Specializations: Data Structures and Algorithms, AI, Machine Learning, Deep Learning, NLP

Methodologies: Agile, Scrum

Soft Skills: Quick Learner, Detail-Oriented, Decision Making, Communication, Multi-tasking, Team Player

Experience

Cognizant | Programmer Analyst Trainee | November 2025 – Present

- **Java Full Stack Development:** Completed 4-month intensive training specializing in Spring Boot and React for end-to-end applications.
 - **Microservices Architecture:** Implemented distributed systems using Spring Cloud, Eureka (service discovery), and API Gateway.
 - **Project Engineering:** Developed the Compliance module for the PetroManage system, focusing on automated reporting and audit logging.
 - **Tech Stack & Workflow:** Managed data with MySQL/Hibernate and collaborated in an Agile environment using Jira and Git.
-

Education

Bachelor of Engineering in Computer Science (AI & ML)

Neil Gogte Institute of Technology (NGIT) | 8.62 CGPA | 2021 - 2025

Intermediate

Sri Chaitanya Junior College | 97.4% | 2019 - 2021

School

Vasavi Public School | 90% | 2009 - 2019

Projects

- **LINGUAVOX: Multi-Format, Multi-Language Text-to-Audio with Voice Personalization**
Developed a team-based accessibility tool that converts PDFs, DOCX, images, and URLs into multilingual speech. Engineered the text extraction pipeline and integrated NVIDIA's NLP API for

summarization and Q&A functionality. Assisted in implementing TTS (Text-to-Speech) with playback controls and deployed the final application via Streamlit for a seamless, speech-enabled user experience.

Technologies: Python, Streamlit, LangChain, gTTS, NVIDIA API, Pytesseract, BeautifulSoup

GitHub: github.com/guna59129/Linguavox

Link: linguavox.streamlit.app

- **Dynamic Pricing of Financial Products**

Developed an AI-powered pricing model to personalize interest rates for Fixed Deposits and Home Loans. Designed a user-friendly frontend using Flask and Bootstrap, focusing on accessibility and clear natural language explanations for predictions. The solution, which utilized ML for risk-based rate optimization, successfully advanced to Stage 2 of the competition.

Technologies: Python, Flask, Scikit-learn, MongoDB, NVIDIA API, REST APIs, Bootstrap

GitHub: github.com/VishVandhan004/Null_Pointer_Team-Virtusa-JatayuS4

- **PETROMANAGE: Oil & Gas Assets & Operations Management System**

Developed a microservices-based system to streamline petroleum asset tracking and operational workflows. I engineered the Compliance module, enabling administrators to perform full CRUD operations on compliance reports. I also implemented a system where audit logs are automatically generated to track every update or deletion, ensuring complete transparency and regulatory accountability.

Technologies: Java, Spring Boot, Microservices, React, Hibernate, MySQL

Achievements and Certifications

- LeetCode: Solved 376+ problems, demonstrating strong proficiency in Data Structures and Algorithms.
- Virtusa Jatayu S4 Hackathon: Advanced to Stage 2 with an AI-powered dynamic pricing system for financial services.
- Crop Intellect: Received faculty recognition for innovation and practical impact in ML-driven agriculture.
- Linguavox: Successfully developed an AI-based accessibility tool for multi-format document analysis and summarization.
- IBM Certification: Earned a Certificate of Honors in Databases and SQL for Data Science.
